Dear Sir;

I have recently purchased a GPS 2400. It is amazing! My wife has allergies and very sensitive to odors. I installed it on my unit and within 24 hours all the odors were gone. The house had a musty smell that was always in the air.

My wife had to sleep with a portable hepa air filter system, leave it on all the time with the door shut. Even with the hepa filter she would wake up with stopped up sinuses. With this new unit she doesn't have the stopped up sinuses.

One time our neighbor was burning leaves and the house filled up with smoke so I turned the fan back on to circulate the air and within the hour the smoke and smell was gone.

I had to change out my furnace and the unit did not work for several days. Some of the musty smells came back. Now it is operating all the time and don't have smells now.

I heard about the GPS 2400 while I was in a hot gas bypass class. I was skeptical about it came home and talked to my wife about it. I purchased one for my home, I am glad that I did.
