Pete,

I wanted to thank you for the wonderful suggestion of installing the cold plasma ionization generator...I have 2 SMELLY dogs that sleep in the laundry room....Even though we bath the dogs frequently they still get funky rather quickly. I leave and come home for work through the laundry room as it leads to the garage...needless to say having the stinky dog smell be the first & last thing I experience every day is not good. Within 24 hours of having the device installed there is NO smell at all. Not only that but the whole house just seems CLEAN & CRISP....It's like a clean pallet....So now if we have incense or candles the smells are not muddled by "house smells"....it's truly amazing. Thanks again for your advice.

-Scott R.
